

CODE MAHOTSAV

On the occasion of India's 75th Independence Day, we are organizing a fun activity for you guys. The intent of this activity is that you should learn how to perform well and develop applications in a limited amount of time.

CODE MAHOTSAV - the 75 hour long Coding Challenge, is going to enhance your development skills by challenging your front-end learnings so far.

Project : Number Guessing Game

About the Project :

Number guessing game is a classical game that focus on your guessing ability with respect to the suggestions you are getting. You have to guess the dynamically created number between 1 to 100. Once you enter a number and enter, it will give you a suggestion message whether the entered number is greater or smaller than the actual number. Once you guess the right number it will give you the message accordingly.

Project Demo : [Number Guessing Game](#)

Customizations :

1. You need to remake the UI (User Interface) according to our national flag. The design elements can be yours but the UI should be in tri-colour (Saffron - White - Green)
2. Try to use good google fonts and animations when the suggestion message will appear.

Duration :

You have to submit the project within 75 hours i.e. from 9 pm Friday (12th AUGust, 2022) to 11:59 pm Monday (15th August, 2022) with all the recommended changes/customizations. No submissions will be accepted post the deadline.

Process of Submission :

You have to make a github repo named "Testbook_Activity_ProjectName" and push your files on the repository and submit the link in this [Google Form](#).

Note:

1. Don't try to copy the code from the existing repo of the demo project shown in the link.
2. It is compulsory to customize the UI of the project accordingly as mentioned, if nothing is changed in the UI challenge will not be accepted.

So, gear up for this amazing project and hoping to see some great creative side of yours!!
